# FACULTY INNOVATION GRANTS FOCUSED ON INTEGRATING ARTIFICIAL INTELLIGENCE IN TEACHING AND LEARNING

This grant is intended to support faculty in the development of creative application of AI to enhance learning and educational experience in Fall 2025 courses. Project development is to run through Summer 2025, with project presentations in August and September 2025, and implementation in courses taught in Fall 2025. For more information on eligibility and requirements, please visit this link.

To apply, please email this completed application form and your current CV in a single email to grosenbl4@touro.edu. Applications will be evaluated as they come in for as long as funds are available..

Name: _____

School/Program: _____

Position: _____

Touro Email: _____ @ _____

Course name/number: _____

1.  Describe your experience with or interest in artificial intelligence or similar technologies.

2.  You have two options for your proposal:

    • **Option 1**: Describe a specific project that you propose to use or develop AI tools for supporting student learning such as AI study guides, tutors, or alike.

    • **Option 2**: Describe your general interest in integrating AI into your teaching and identify the course(s) you would seek to integrate AI into, even if you do not have specific ideas yet of how to do so.

3.  If you already know of software platforms which provide AI capabilities for your project, please list them here, and how you anticipate using them. Note that we will give support to all project teams to find and develop AI infrastructure appropriate to each project. The use of all AI platforms must be approved to use within Touro University policies. We will investigate the possibility of using other platforms that faculty find would be useful to complete their initiatives. We cannot guarantee the availability of any particular platform.
